

# 2X THE STORAGE

“A quiet little box that I can connect to a MacBook ... the way I visualize RAID will have to change ... completely silent.”

—Steve Sande, The Unofficial Apple Weblog

## OWC Mercury Elite Pro Dual mini

THE PROFESSIONAL, YET PORTABLE RAID STORAGE SOLUTION FOR DIGITAL PROS WHO DON'T KNOW WHAT IT MEANS TO GO EASY ON THEIR GEAR

Perfect for video, digital photography, professional music, graphics, and general data, the Mercury Elite Pro Dual mini offers the large storage capacity of RAID 0, 1, Independent or JBOD (SPAN), while RAID 1 provides data protection. Bus-powered operation (no AC adapter required) makes this an extremely portable RAID solution for working on location, in the studio, at home or in the office. Durable brushed aluminum case is stackable so it keeps your desktop clean while maintaining a professional appearance, but don't let that keep you from slipping it into your bag—it's a rugged storage solution, it can handle it.

“Superior performance...  
highly recommended.”

—LloydChambers, DigLloyd
